Project Design Phase-I
SolutionArchitecture

Date	08 October2022
Team ID	PNT2022TMID22348
Project Name	News TrackerApplication
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

1. Find the best tech solution to solve existing business problems.
2. Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
3. Define features, development phases, and solution requirements to the project.
4. Provide specifications according to which the solution is defined, managed, and delivered to the customers.
